Service area: All of the United States. **Disaster Response Registry:** Yes.

Service lines

IT Services for Government Contractors

End-user IT, infrastructure support, and modernization help for small public-sector teams and prime contractor task orders.

Cybersecurity Support Services

Cybersecurity awareness, compliance support, and sensible-defaults security for small public-sector and commercial teams.

Cloud Engineering and Migration Services

Cloud migrations, AWS-focused infrastructure support, and modernization work scoped to the customer's actual workload.

DevOps and CI/CD Automation Services

Pragmatic DevOps adoption — pipelines, environments, infrastructure-as-code, and release discipline.

AI Readiness and Prompt Engineering Training

Two-hour workshops, half-day bootcamps, and prompt-engineering courses for public-sector and prime-contractor teams.

AI Operations and Automation Support

Secure, useful AI in real environments — automation workflows, prompt libraries, and operational guardrails.

Help Desk and End-User IT Support

Tier 1-2 help desk and end-user support for small public-sector and prime-contractor teams.

Software Development and Systems Integration

Custom software development and small-system integration scoped to fit the customer's team and budget.

Program Management and Technical Support

Program management, technical PMO support, and engineering technical assistance for prime contractor and federal teams.

IT and Telecommunications Training

Targeted IT and telecom training delivered to government and commercial teams.

HR Consulting and Recruiting Support

Workforce planning, recruiting coordination, hiring workflow design, and onboarding improvements for small teams.

Workforce Enablement for Public-Sector Teams

Enable customer staff with the training, tools, and workflow changes that actually move the work.
